

# TELL EPA TO GET THE LEAD OUT!

The original Superfund site is NOT cleaned up!

16.9  
5/23/03

- Interior of homes/schools and hundreds of residential yards have not been decontaminated.
- Kellogg Mayor Mac Pooler is concerned, "they were supposed to do my yard this year, finally I get in line to have my yard done. But to leave us sitting here and not be cleaned up, that's not a fair deal in my view." (*The Spokesman-Review*, May 2, 2003)
- Clean up means a healthy community, jobs and economic development.
- Our children are at risk every day while attending lead infested schools and yards.
- NO levels of lead are safe! (*New England Journal of Medicine*)
